PROJECTS

Project 1

AI Driven Institute chatbot

Remote

- I am passionate about AI-driven solutions and currently developing an institute travel chatbot that provides real-time transport schedules using machine learning and NLP. Through this internship, I seek to deepen my understanding of chatbot development, enhance my AI/ML expertise, and contribute innovative ideas to real-world applications. I am eager to collaborate with experienced professionals, learn industry best practices, and develop intelligent conversational systems that enhance user experience.
- Tech : NLP, ML, Python, Chatbot Frameworks, DBMS

Project 2

Student Information system

Remote

This project has been developed for our college in which Any student can get information about any other students through RgdNo and RollNo, also a group of students can be retrieved through search by semester, stream, branch, address etc

Tech Stack: Java, Swing, JDBC, MYSQL

ACHIEVEMENTS

Career Development Coordinator

Led and coordinated career development initiatives for the entire batch, fostering professional growth and career readiness. Contributed to the development of career resources and materials, including online platforms and informational brochures.

Core Member, IIEC (Idea Innovation and Entrepreneurship Cell)

Actively contributed to the organization of various entrepreneurial initiatives, including seminars, workshops, and hackathons. Supported student participation in business plan competitions and pitch events.

Content Creation Achievements

Strong content creation skills by achieving 1k subscribers on Youtube and 1M views on various videos. It has boosted confidence and made me super strong. It's enhanced my Creative side and it's helped me find my another Strength i.e Video Editing.

INTERNSHIP

In this project, I collaborated with my teammates to design and develop a website for Oceanic Tours and Travels, utilizing Java for backend development where customers could easily explore travel packages, book trips, and access relevant travel information. My role focused on coding various functionalities such as booking forms, forming package user interactions. We employed Java for dynamic page updates and database connectivity. The final product was a fully functional, responsive, efficient website.

STRENGTHS

Java Java Swing, Servlets

Python, NumPY

pandas OOPs, DSA

Dbms, MYSQL, SQL CN, OS

Hard-working

Motivator

Leader

Communication & Interpersonal Skill

Determined
